

AGENDA
Initial Public Meetings – Coastal Hazard Resiliency Tools Project

For Residents of the Cities of Biddeford and Saco

Saco City Hall, Council Chambers
7 p.m., Thursday, August 14th, 2008

For Residents of the Towns of Scarborough and Old Orchard Beach

Old Orchard Beach Town Hall, Council Chambers
7 p.m., Wednesday, August 20th, 2008

Presentation of Newest Coastal Hazard Information and GIS Mapping:

- Measurements of Sea Level Rise
- New Mapping of Low-lying Flood-prone Areas with More Accurate **LIDAR** Data (**L**ight **D**etection and **R**anging information on land elevations, gathered from an Airplane)
- Assessments of Recent Storms
- Predictions of Future Storm Impacts with Various Assumptions Regarding Sea Level Changes

Peter A. Slovinsky, Senior Geologist, Maine Geological Survey, Maine Department of Conservation.

Adaptations to the Changing Threats from Coastal Hazards

- Examples of Best Practices from Other Communities
- Introduction of Possible Capital Planning and Regulatory Approaches
- Next Steps for Our Communities, Working Toward Creating a Regional Action Plan
- Plans for Continued Work this Fall and Winter

Jonathan T. Lockman, Planning Director, Southern Maine Regional Planning Commission.

Funded by a grant from the Maine Coastal Program, Maine State Planning Office
