At the previous meeting, the steering committee asked J.T. and Pete to make their coastal hazard resiliency tools presentations at today's meeting, to provide background to this project.

The meeting was called to order at 8:34 am and began with Pete Slovinsky's presentation. During the presentation, Jay suggested that Pete include the number of 100-year storms that have actually occurred on the "Sea level rise and floodplains..." slide. J. T. then gave his presentation.

It was agreed that draft 3 of the interlocal agreement would be reviewed at the next meeting.

The meeting was adjourned at 10:08 am.
